

HA (Influenza A Virus Hemagglutinin) Polyclonal Antibody

CATALOG #: 3924-100

AMOUNT: 100 µg

LOT #: _____

HOST: Rabbit

IMMUNOGEN: Synthetic peptide surrounding amino acid 100 of HA (Internal ID# BV-D29G).

SPECIES REACTIVITY: Human, Mouse, Rat

FORMULATION:
100 µg (0.5 mg/ml) affinity purified rabbit polyclonal antibody in phosphate-buffered saline (PBS), pH 7.2, containing 30% glycerol, 0.5% BSA, and 0.01% thimerosal.

STORAGE CONDITIONS: Store at -20°C. For long term storage, store at -70°C.

DESCRIPTION:
Influenza A viruses are surface glycoprotein, single stranded, segmented RNA viruses that are found in birds. Influenza A subtypes are based on the virus glycoproteins hemagglutinin (HA) and neuraminidase (NA). There are 16 different HA antigens and nine different N antigens for influenza A virus that have been isolated from wild birds.

SPECIFICITY:
The antibody recognizes ~28 kDa HA in samples from human, mouse and rat origins. Reactivity to other species has not been tested.

APPLICATION AND USAGE:
The antibody can be used for Western blotting (0.5-4 µg/ml). However, the optimal conditions should be determined individually. Blocking peptide (Cat.# 3924BP-50) is available separately.

Cat. #: 3924-100
Western blot analysis of HA expression in lysate from rat kidney (Lane 1), 3T3 cells (Lane 2) and Jurkat cells (Lane 3 & 4).

FOR RESEARCH USE ONLY! Not to be used on humans.
