

Catalog No. LF-MA0082

MONOCLONAL ANTIBODY

Anti-Glutaredoxin 1 (30A1)

Background : Glutaredoxin (Grx), also known as thiol transferase, is a small heat-stable oxidoreductase. Grxs form part of the glutaredoxin system, comprising NADPH, GSH and glutathione reductase, which transfers electrons from NADPH to glutaredoxins via GSH (1). First recovered in *E.coli* as GSH-dependent hydrogen donors for ribonucleotide reductase, Grx catalyzes GSH-disulfide oxido-reductase via two redox-active cysteine residues (2). The active sequence (Cys-Pro-Tyr-Cys) is conserved in a variety of species. The 12 kDa dithiol protein has a role in reduction of mixed disulfides in cells exposed to oxidative stress (3).

Immunogen : Recombinant human protein purified from *E.coli*

Host : Mouse

Clone number : 30A1

Isotype : IgG1, k

Size : 100ul

Composition : PBS containing 50% glycerol

Positive control : HepG2 cell lysates

Storage : store for 1 year at -20°C from date of shipment

Species cross reactivity

Human	Mouse	Rat
+	-	-

IMMUNOPRECIPITATION ANALYSIS of HepG2 cell lysates:
Lane 1: Input Lane 2: Precipitates
Immunoblot : anti-Grx 1 polyclonal antibody (# LF-PA0017)

Applications :

Immunoprecipitation (1-2ul/400ul lysates)
