• Rabbit Anti-beta-Actin (Loading Control) Polyclonal Antibody, Cy7 conjugated

Conjugated Primary Antibodies

Background:

Loading Control

This gene encodes one of six different actin proteins. Actins are highly conserved proteins that are involved in cell motility, structure, and integrity. This actin is a major constituent of the contractile apparatus and one of the two nonmuscle cytoskeletal actins. [provided by RefSeq, Jul 2008].

Purification: Was purified by Protein A and peptide affinity chromatography.
