

Monoclonal anti human VEGF-C

ORDERING INFORMATION

Catalog Number:	hAP-0006
Size:	100 µg
Storage:	< -20 °C
Immunogen:	human VEGF-C recombinant protein
Ig Type:	IgG2
Clone:	MM0006-2E65
Applications:	WB

Preparation: This antibody was produced from a hybridoma (mouse myeloma fused with spleen cells from a mouse immunized with recombinant human VEGF-C recombinant protein).

Formulation and Storage: The IgG fraction of culture supernatant was purified by Protein G affinity chromatography and lyophilized from a 0.2 µm filtered solution in phosphate-buffered saline (PBS). Lyophilized samples are stable for 2 years from date of receipt when stored at -70°C.

Reconstitution: Reconstitute the antibody with 500 µl sterile PBS and the final concentration is 200µg/ml. Reconstituted antibody can also be aliquoted and stored frozen at < -20 for at least for six months without detectable loss of activity. **Avoid repeated freeze-thaw cycles.**

Specificity: This antibody detects human VEGF-C in western blots. No cross-reactivity is shown with human VEGFA, VEGF-B and VEGF-D. Cross-reactivity to other species is not tested.

Applications

1. Western Blot:	Yes	(1:1000)
2. Immunohistochemistry (Formalin/Paraffin)	Yes	(1:25-50)

Formalin fixed and paraffin embedded normal human placenta tissue is subjected to mouse anti human VEGF-C (hAP-0006)

Final dilutions should be optimized by the end users and the dilutions provided in the data sheet are for reference only.
