

Monoclonal anti human ICAM1

ORDERING INFORMATION

Catalog Number:	hAP-0011
Size:	100 µg
Storage:	< -20 °C
Immunogen:	hu re-ICAM1 N-terminal protein
Ig Type:	IgG1
Clone:	MM0011-7D22
Applications:	Western blot, IHC, and ELISA

Preparation: This antibody was produced from a hybridoma (mouse myeloma fused with spleen cells from a mouse immunized with human ICAM1 N-terminal recombinant protein).

Formulation and Storage: The IgG fraction of culture supernatant was purified by Protein G affinity chromatography and lyophilized from a 0.2 µm filtered solution in phosphate-buffered saline (PBS). Lyophilized samples are stable for 2 years from date of receipt when stored at -70°C.

Reconstitution: Reconstitute the antibody with 500 µl sterile PBS and the final concentration is 200µg/ml. Reconstituted antibody can also be aliquoted and stored frozen at < -20 for at least for six months without detectable loss of activity. **Avoid repeated freeze-thaw cycles.**

Specificity: In western blots, this antibody shows no cross-reactivity with hVECA2 and hVEGF3, and VCAM1.

Applications

1. Western blotting:	Yes	(1:100-1000)
2. IHC (Formalin/Paraffin)	Yes	(1:25-50)
3. ELISA:		

Formalin fixed and paraffin embedded normal human placenta tissue is subjected to mouse anti human ICAM1 (hAP-0011)

Final dilutions should be optimized by the end users and the dilutions provided in the data sheet are for reference only.
