

Monoclonal anti human VE-Cadherin

ORDERING INFORMATION

Catalog Number:	hAP-0012
Size:	100 µg
Storage:	< -20 °C
Immunogen:	Extracellular domain of human VE-Cadherin recombinant protein
Ig Type:	IgG1
Clone:	MM0012-8A03
Applications:	WB

Preparation: This antibody was produced from a hybridoma (mouse myeloma fused with spleen cells from a mouse immunized with Extracellular domain of human VE-Cadherin recombinant protein).

Formulation and Storage: The IgG fraction of culture supernatant was purified by Protein G affinity chromatography and lyophilized from a 0.2 µm filtered solution in phosphate-buffered saline (PBS). Lyophilized samples are stable for 2 years from date of receipt when stored at -70°C.

Reconstitution: Reconstitute the antibody with 500 µl sterile PBS and the final concentration is 200µg/ml. Reconstituted antibody can also be aliquoted and stored frozen at < -20 for at least for six months without detectable loss of activity. **Avoid repeated freeze-thaw cycles.**

Specificity: In western blots this antibody shows no cross-reactivity with E-Cadherin, and P-Cadherin.

Applications

1. Western Blot:	Yes	(1:1000-2000)
2. ELISA	Yes	(1:1000-3000)
3. Immunohistochemistry	Yes	(1:100-200)

Formalin fixed and paraffin embedded human placental tissue section is subjected to IHC with anti human VE-Cadherin (hAP-0012).

Final dilutions should be optimized by the end users and the dilutions provided in the data sheet are for reference only.
