

Mouse Monoclonal anti-human TIMP-2

ORDERING INFORMATION

Catalog No:	hAP-0035
Size:	100 µg
Storage:	< -20° C
Immunogen:	human recombinant TIMP-2 protein
Ig Type:	mouse IgG1
Clone:	MM0035-2C13
Applications:	Western blot & IHC

Preparation: This antibody was produced from a hybridoma (mouse myeloma fused with spleen cells from a mouse immunized with purified recombinant human tissue inhibitor of metalloproteinases-2 (TIMP-2)).

Formulation and Storage: The IgG fraction of culture supernatant was purified by Protein G affinity chromatography and lyophilized from a 0.2 µm filtered solution in phosphate-buffered saline (PBS). Lyophilized samples are stable for 2 years from date of receipt when stored at -70°C.

Reconstitution: Reconstitute the antibody with 500 µl sterile PBS and the final concentration is 200µg/ml. Reconstituted antibody can also be aliquoted and stored frozen at < -20 for at least for six months without detectable loss of activity. **Avoid repeated freeze-thaw cycles.**

Specificity: This antibody recognizes human TIMP-2 in western blot. No cross-reactivity to human TIMP-1 is noted.

Applications:

1. Western blotting:	Yes	(1:100-1000)
2. IHC (Formalin/Paraffin)	Yes	(1:100-200)

Formalin fixed and paraffin embedded normal human placenta tissue is subjected to mouse anti human TIMP-2 (hAP-0035)

Final dilutions should be optimized by the end users and the dilutions provided in the data sheet are for reference only.
