Mouse anti-human CCR4

ORDERING INFORMATION

Catalog No:	hAP-0064
Size:	100 µg
Storage:	< -20° C
Immunogen:	Human CCR4 transfected 293 cells
Ig Type:	mouse IgG2
Clone:	MM0064-9G12
Applications:	FC

Preparation: This antibody was produced from a hybridoma (mouse myeloma fused with spleen cells from a mouse immunized with 293 cells transfected with human CCR4).

Formulation and Storage: The IgG fraction of culture supernatant was purified by Protein G affinity chromatography and lyophilized from a 0.2 µm filtered solution in phosphate-buffered saline (PBS). Lyophilized samples are stable for 2 years from date of receipt when stored at -70°C.

Reconstitution: Reconstitute the antibody with 200 µl sterile PBS and the final concentration is 500µg/ml. Reconstituted antibody can also be aliquoted and stored frozen at < -20 for at least for six months without detectable loss of activity. **Avoid repeated freeze-thaw cycles.**

Specificity: This antibody was selected for its ability to detect human CCR4, not other CCRs.

Applications:

1. FC: Yes (1:100-800)

Final dilutions should be optimized by the end users and the dilutions provided in the data sheet are for reference only
