Mouse anti-human CD80 (B7-1)

ORDERING INFORMATION

Catalog No: hAP-0100
Size: 100 µg
Storage: < -20° C
Immunogen: Human recombinant CD80 EC domain
Ig Type: mouse IgG1
Clone: MM0100-6N36
Applications: FC, Neutralization and IHC

Preparation: This antibody was produced from a hybridoma (mouse myeloma fused with spleen cells from a mouse immunized with **human recombinant protein of CD 80 (also called B7-1)**).

Formulation and Storage: The IgG fraction of culture supernatant was purified by Protein G affinity chromatography and lyophilized from a 0.2 µm filtered solution in phosphate-buffered saline (PBS). Lyophilized samples are stable for 2 years from date of receipt when stored at -70°C.

Reconstitution: Reconstitute the antibody with 200 µl sterile PBS and the final concentration is 500µg/ml. Reconstituted antibody can also be aliquoted and stored frozen at < -20 for at least for six months without detectable loss of activity. **Avoid repeated freeze-thaw cycles.**

Specificity: This antibody was selected for its ability to detect human **CD80** protein by FC.

Applications:

1.	FC	Yes	(1:50-100)
2.	Neutralization	Yes	
3.	IHC (paraffin)	Yes	(1:50-100)

Final dilutions should be optimized by the end users and the dilutions provided in the data sheet are for reference only
