Mouse anti-human CCRL-2/CRAM-A/B

ORDERING INFORMATION

Catalog No: hAP-0158
Size: 100 µg
Storage: < -20° C
Immunogen: Human recombinant CCRL-2
Ig Type: mouse IgG2
Clone: MM0158-5A15
Applications: FC

Preparation: CCRL-2 exists as two isoforms: CRAM-A and CRAM-B). This antibody was produced from a hybridoma (mouse myeloma fused with spleen cells from a mouse immunized with **human recombinant protein of CCRL-2 (CRAM-A)**).

Formulation and Storage: The IgG fraction of culture supernatant was purified by Protein G affinity chromatography and lyophilized from a 0.2 µm filtered solution in phosphate-buffered saline (PBS). Lyophilized samples are stable for 2 years from date of receipt when stored at -70°C.

Reconstitution: Reconstitute the antibody with 200 µl sterile PBS and the final concentration is 500µg/ml. Reconstituted antibody can also be aliquoted and stored frozen at < -20 for at least for six months without detectable loss of activity. **Avoid repeated freeze-thaw cycles.**

Specificity: This antibody was selected for its ability to detect both human **CRAM-A and CRAM-B isoforms.**

Applications:

1. FC Yes (1:20-100)

Final dilutions should be optimized by the end users and the dilutions provided in the data sheet are for reference only
