## Mouse anti-human CD151

### ORDERING INFORMATION

|                      |                                |
|----------------------|--------------------------------|
| <b>Catalog No:</b>   | <b>hAP-0160</b>                |
| <b>Size:</b>         | <b>100 µg</b>                  |
| <b>Storage:</b>      | <b>&lt; -20° C</b>             |
| <b>Immunogen:</b>    | <b>Human recombinant CD151</b> |
| <b>Ig Type:</b>      | <b>mouse IgG2</b>              |
| <b>Clone:</b>        | <b>MM0160-6F40</b>             |
| <b>Applications:</b> | <b>FC</b>                      |

**Preparation:** This antibody was produced from a hybridoma (mouse myeloma fused with spleen cells from a mouse immunized with **human recombinant protein of CD151**).

**Formulation and Storage:** The IgG fraction of culture supernatant was purified by Protein G affinity chromatography and lyophilized from a 0.2 µm filtered solution in phosphate-buffered saline (PBS). Lyophilized samples are stable for 2 years from date of receipt when stored at -70°C.

**Reconstitution:** Reconstitute the antibody with 200 µl sterile PBS and the final concentration is 500µg/ml. Reconstituted antibody can also be aliquoted and stored frozen at < -20 for at least for six months without detectable loss of activity. **Avoid repeated freeze-thaw cycles.**

**Specificity:** This antibody was selected for its ability to detect human **CD151**.

#### **Applications:**

1. FC Yes (1:20-100)

**Final dilutions should be optimized by the end users and the dilutions provided in the data sheet are for reference only**
