Mouse anti-human Interleukin-18 R β (IL-18 R β)

ORDERING INFORMATION

Catalog No:	hAP-0381
Size:	100 μg
Storage:	< -20° C
Immunogen:	Human recombinant IL-18Rβ EC domain
Ig Type:	mouse IgG1
Clone:	MM0381-10D34
Applications:	WB and Neutralization

Preparation: This antibody was produced from a hybridoma (mouse myeloma fused with spleen cells from a mouse immunized with **human recombinant protein of IL-18 R β** extracellular domain).

Formulation and Storage: The IgG fraction of culture supernatant was purified by Protein G affinity chromatography and lyophilized from a 0.2 μ m filtered solution in phosphate-buffered saline (PBS). Lyophilized samples are stable for 2 years from date of receipt when stored at -70°C.

Reconstitution: Reconstitute the antibody with 200 μ l sterile PBS and the final concentration is 500 μ g/ml. Reconstituted antibody can also be aliquoted and stored frozen at < -20 for at least for six months without detectable loss of activity. **Avoid repeated freeze-thaw cycles.**

Specificity: This antibody was selected for its ability to detect human **IL-18 R β** .

Applications:

- | | | | |
|-----------|---|------------|---------------------|
| 1. | WB | Yes | (1:500-2000) |
| 2. | Neutralization of IL-18Rβ signaling | Yes | |

Final dilutions should be optimized by the end users and the dilutions provided in the data sheet are for reference only
