Mouse anti-human Interleukin-2 R α (IL-2 R α)

ORDERING INFORMATION

Catalog No:	hAP-0391
Size:	100 μg
Storage:	< -20° C
Immunogen:	Human recombinant IL-2 Rα EC domain
Ig Type:	mouse IgG1
Clone:	MM0391-1X27
Applications:	WB, IHC and Neutralization

Preparation: This antibody was produced from a hybridoma (mouse myeloma fused with spleen cells from a mouse immunized with **human recombinant protein of IL-2 R α** extracellular domain).

Formulation and Storage: The IgG fraction of culture supernatant was purified by Protein G affinity chromatography and lyophilized from a 0.2 μ m filtered solution in phosphate-buffered saline (PBS). Lyophilized samples are stable for 2 years from date of receipt when stored at -70°C.

Reconstitution: Reconstitute the antibody with 200 μ l sterile PBS and the final concentration is 500 μ g/ml. Reconstituted antibody can also be aliquoted and stored frozen at < -20 for at least for six months without detectable loss of activity. **Avoid repeated freeze-thaw cycles.**

Specificity: This antibody was selected for its ability to detect human **IL-2 R α** .

Applications:

1. WB	Yes	(1:500-2000)
2. Neutralization of IL-2Rα signaling	Yes	
3. IHC (paraffin)	Yes	(1:20-100)

Final dilutions should be optimized by the end users and the dilutions provided in the data sheet are for reference only
